

# Bureau of Extranormal Encounters & Fractalations

## Event Catalyst Profile

### Agent Edi Blue Hill

Agent Blue Hill is a technology expert and has handled considerable advancements in Bureau equipment. He has proven himself remarkably adept at on-the-fly assembly and upgrades, often with nonstandard equipment. Agents are advised to secure *any* technology, even so-called "junk," before attempting a confrontation. Details on all known spontaneous field equipment upgrades, as well as any administrative response to said upgrades, are on record in File R3C9E7.

Agents are advised to consult the same file for information regarding a Level 5 Fractalation caused by Agent Blue Hill, possibly an intentional attempt to kickstart the Event, but supposedly an experiment in weather control which resulted in a splinter dimension populated by sentient weather. Agents are strongly advised to keep dimensional portals and similar equipment secure at all times during interactions.

Subsequent to the Level 5 Fractalation, Agent Blue Hill was reassigned to Field Team Delta 7, assignment: Reddington.

Reports of precognitive visions have been tested and confirmed, but Blue Hill has largely focused his career on technology in spite of the potential for advancement such visions could provide. In an interview with one of the Bureau's Resource Specialists during a regular performance review, Blue Hill cited a strong preference for the technical side of B.E.E.F. and a desire to invent something "world-changing." This may have been a veiled reference to their role in the Event; see File R3C9E7 for further speculation regarding that role. The same performance review and analysis by Resource Specialists determined they hold some resentment of the Bureau's extensive system of rigorous testing and probation periods.

It is suspected but unconfirmed that he has more visions than he has informed the Bureau about; a spirit guide has been mentioned, but Blue Hill declined further tests. The Bureau is particularly interested in anything this guide may know about the Event, the Catalysts, or any other secret knowledge Blue Hill is attempting to hide.

Known weak points: Blue Hill remains in contact with friends and family outside the Bureau, and appears to be especially close with his sister. Further investigation into his family history revealed he was present at his grandfather's death and remains shaken by the experience; see File R3C9E7.

Threat Level Classification: **Rampant.** Blue Hill's skill with technology is alarming and uncontrolled, and he is undoubtedly hiding the truth of his visions from the Bureau. Confront only if all technology has been taken from him. Agents are advised to gather information on Blue Hill's visions if possible.
